

MUHAMMAD ADRIE FADZLY BIN FAKRI FAZRI

Phone: 013-6817515 | E-mail: mafadzly@gmail.com | Address: Johor Bahru, Johor
Portfolio (GitHub): <https://github.com/adfdzly>

Final year Computer Science student specializing in Big Data with hands-on experience in backend development, data-driven applications, and software engineering projects. Eager to learn, contribute, and further develop technical skills in a professional environment.

EDUCATION

Bachelor In Computer Science (Honours)

MARA University of Technology (UiTM) Malacca Branch Jasin Campus

CGPA: 3.75

Oct 2023 - Present

Malaysian Matriculation Certificate

Malacca Matriculation College

CGPA: 3.90

Jul 2022 - Jun 2023

Malaysian Certification of Education (SPM)

Maktab Sultan Abu Bakar (English College)

Result: 6A, 2B

Jan 2017 - Mar 2022

PROJECTS

ML-Powered Price Comparison & Market Intelligence Platform (Final Year Project)

In Progress

Django, Python, Redis, Celery, REST API, MySQL, Docker, ML

- Engineered automated scraping and ETL pipelines processing over 400+ product records for real-time e-commerce price tracking and trend analysis
- Reduced backend response latency through Redis caching, Celery asynchronous task queues, and database query optimization
- Integrated machine learning models achieving 77% prediction accuracy for pricing trend analysis and predictive insights generation
- Deployed and managed 6 containerized services in a self-hosted Linux environment using Docker and virtualization infrastructure

Self-Hosted Infrastructure & Containerized Deployment Environment

May 2026

- Managed a self-hosted virtualization environment running 2+ virtual machines and 10+ containers using Proxmox and Ubuntu Server
- Deployed and maintained containerized backend services and infrastructure tooling with Docker
- Configured Linux networking, remote access, virtualization, and system administration workflows across multiple self-hosted services
- Maintained homelab infrastructure supporting deployment testing, service hosting, and continuous system experimentation

Full-Stack Dental Appointment & Clinic Management System

Jun 2025

- Built a clinic management system with automated appointment scheduling and workload-based staff assignment
 - Implemented backend scheduling logic to dynamically assign doctors and staff based on availability
 - Developed role-based interfaces and MySQL database workflows for appointment and patient management
-

WORK EXPERIENCE

Part Time Sales Assistant

June 2023 - Aug 2023

Padini Holdings Berhad

- Verified 300-500 incoming inventory deliveries against stock lists to ensure accuracy and consistency
 - Assisted customers in product selection according to preferences and providing recommendations
-

LEADERSHIP & EXTRACURRICULAR

President of Persatuan Seni Silat Cekak Malaysia

Dec 2024 - Dec 2025

MARA University of Technology (UiTM) Malacca Branch Jasin Campus

- Led a committee of 7 members in planning and executing various club activities
- Developed outreach and engagement strategies to promote the club, successfully increasing participation in club events and activities by more than 150%
- Coordinated a cross-campus performance event with 2 UiTM branches to increase student engagement

Treasurer of Malaysian Civil Defence Department

Oct 2023 - Feb 2025

MARA University of Technology (UiTM) Malacca Branch Jasin Campus

- Managed and monitored the club's financial records, budgeting, and expenditure to ensure accurate and organized fund allocation
- Coordinated the collection and handling of membership fees and event-related payments while maintaining proper financial documentation

Leader of Peer Assisted Learning (Accounting)

Jul 2022 - Jun 2023

Malacca Matriculation College

- Led a team of 5 members in organizing academic support initiatives for students
 - Coordinated group study sessions, revision activities and tutoring classes to assist students with academic challenges, offering a collaborative and supportive learning environment
 - Developed and shared educational quizzes, study materials, and academic content through social media platforms, increasing student engagement in learning activities
-

CERTIFICATIONS

Data Scientist in Python, DataCamp

Sep 2025

Data Analyst in Python, DataCamp

Oct 2025

SKILLS

Technical Skills

Languages: Python, Java, JavaScript, SQL, C++

Frameworks: Django, JSP, Servlets, Bootstrap

Databases: MySQL

Tools & Infrastructure: Docker, Redis, Celery, Proxmox, Linux

Data & Visualization: Tableau, Power BI

Concepts: Machine Learning, REST APIs, Web Scraping, ETL Pipelines, Virtualization

Language

Malay (Native), English (Fluent)
